A NEW KIND OF TECHNOLOGY.

Toyota's world leading Hybrid Synergy Drive® technology is an advanced Hybrid System which teams a petrol engine with an advanced electric motor. The system intelligently manages the input from each power source depending on the driving situation, to provide the optimum balance of performance and fuel economy.

The car only uses the motor. Electricity from the battery drives the motor which reaches full power instantly.

Monitors driving conditions, intelligently controls the engine and motor output for optimum fuel efficiency.

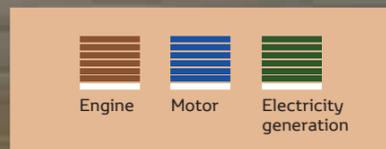

In addition to normal driving, the battery supplies electricity to drive the motor, enhancing driving power.

The motor is activated as a generator to convert the moving vehicle's kinetic energy into electricity and charge the battery (Regenerative Braking).

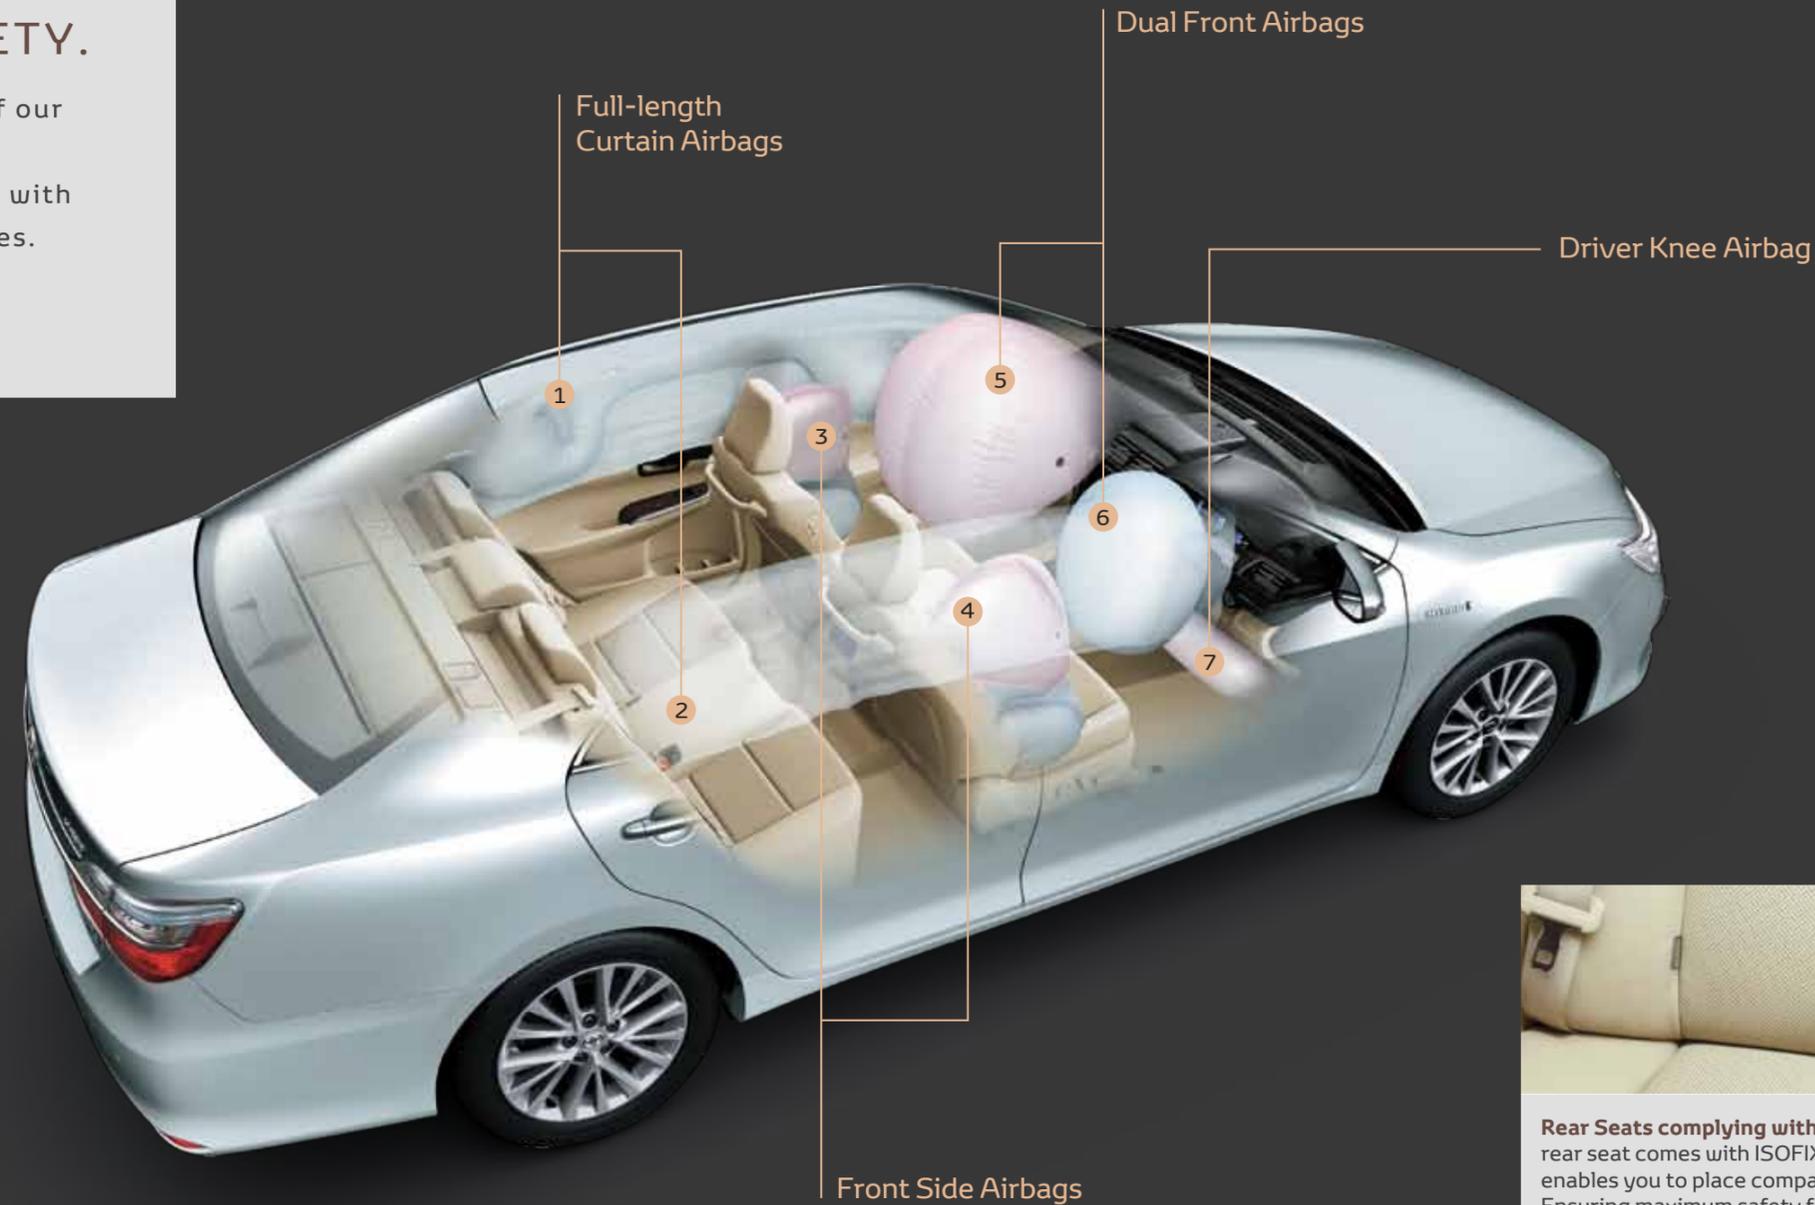

The engine automatically cuts out, helping to reduce unnecessary fuel consumption and CO₂ emissions associated with idling.

Hybrid Synergy Drive® intelligently senses when to switch between the two power sources.

A NEW KIND OF SAFETY.

Just like you, for us safety is one of our top priorities. That's why we have equipped the all New Camry Hybrid with an array of advanced safety features.

7 Airbags Including a Knee Bag: Safety for everyone, from every side. The all New Camry Hybrid comes with a comprehensive airbag system that offers an impressive 7 SRS airbags offering safety for all members of your family.

Hill-Start Assist Control: To ensure that you move ahead at ease, the all New Camry Hybrid prevents backward rolling or slippage when on a steep incline.

Impact Absorbing Vehicle Body: Sturdy from every side. The body structure of the all New Camry Hybrid is constructed in a way that it disperses collision energy through many frame components for effective energy absorption. Making it safer during accidents.

Rear Seats complying with Isofix Standard: The rear seat comes with ISOFIX compliance that enables you to place compatible child seat perfectly. Ensuring maximum safety for your little one.

Vehicle Stability Control: Be in control at every turn. The VSC applies an active braking force independently to the four wheels and ensures stability during turnings.

BEST IN CLASS

Back Monitor with Corner Sensors: Senses what's around and what's behind. The rear camera displays a clear view of the rear while the corner sensors notify the driver of any obstacle near the corner bumpers.

A NEW KIND OF OPULENCE.

Make a bold statement with the luxurious New Toyota Camry.
Also available in 2.5L dual VVT-I Petrol Engine.
