

NEW THINKING. NEW POSSIBILITIES.

People's expectations toward individual mobility require more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individual lifestyles, and it becomes an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

 NEW THINKING.
HYUNDAI NEW POSSIBILITIES.

THE ALL NEW DYNAMIC
SANTAFE 

The All New Dynamic Santa Fe.

In a segment known for 'boxy looks', Hyundai Santa Fe is a sleek and sophisticated marvel. StormEdge—the concept behind the design of the 3rd Generation Santa Fe captures the powerful yet mesmerizing moment of the rise and fall of a storm. Hyundai has set the perfect example in pushing boundaries and delivering this perfect exemplar of brute power.

Power the world surrenders to

The world has always given way to those who display true power. Having taken the world by storm, the Hyundai Santa Fe defines the very phrase 'global phenomenon'. With its unmatched power and inspired design, it is set to bring the 'Sports' back into SUV.

Hexagonal Chrome Grille

The Front Grille of the Hyundai Santa Fe offers you the boldness that you would expect of an SUV. Its storm-edge philosophy is beautifully symbolized in the lines of the front grille.

Xenon Headlamps with LED Positioning Lights

Powerful Xenon headlights come standard with the Santa Fe showing the way ahead by producing a beam brighter than conventional headlights, while consuming less energy. Because they provide a more intense illumination of the road and with the added benefit of headlamp washers, good visibility in bad weather is assured.

LED rear Combination lamps

The Tail lamps in the all new Santa Fe boast of LED lights that make it look classier than even the front of most cars

Fog Lamps with Cornering Function

Fog lamps enhance visibility in the event of heavy fog or rain. Cornering lamps help enhance lateral vision when turning to improve driving safety.

Outside Rearview Mirrors

Aerodynamically sculpted rearview mirrors lend the Santa Fe a perfect combination of breathtaking looks and effective functioning.

Front and Rear Skid Plates

The Skid plates in the Santa Fe let you have a great off-road experience. They make sure that your car is not damaged by rocks, or other obstacles in your path.

Technology that excites you

The new Santa Fe delivers perfection in every way. As you step in, you're overwhelmed by a feeling of opulence and comfort. Its well-appointed interiors and innovative features answer to your every demand.

Steering Wheel with Mounted Audio & Bluetooth Controls: This nifty feature lets you control your audio system and receive calls with a single touch while you enjoy a pleasurable drive.

Touch Screen Infotainment System: The center console with its touchscreen audio system adds form to function in the heart of the Santa Fe. The 2-DIN CD/Radio stereo system lets you enjoy your favourite music with ease.

Cruise Control: The cruise control system allows you to enjoy a long drive like never before. This feature helps to make driving effortless.

Smart Key with Push Button Start: The all new Santa Fe has special sensors that detect the key's presence facilitating remote locking and unlocking of doors. This feature also allows keyless ignition and remote opening of the doors and boot.

USB, AUX and Bluetooth Connectivity: An outdoor experience is not complete without music. That's why the Santa Fe comes with USB, AUX and Bluetooth Connectivity so that your favourite music is always with you.

Cooled Glovebox: The coolness quotient gets amplified in the Santa Fe. The glovebox contains a vent that allows you to keep its contents cool.

Rear Center Armrest with Cup Holder: The armrest in the center of the rear seats has been designed with the backseat passengers in mind, and has built-in, pull-out cup holders for passenger comfort.

12-Way Power Driver Seat: With its 12-way adjustable seat, the Santa Fe moulds itself to suit your contours, making for a more pleasurable drive.

A Perfect Blend of Futuristic Technology And Superior Ergonomics

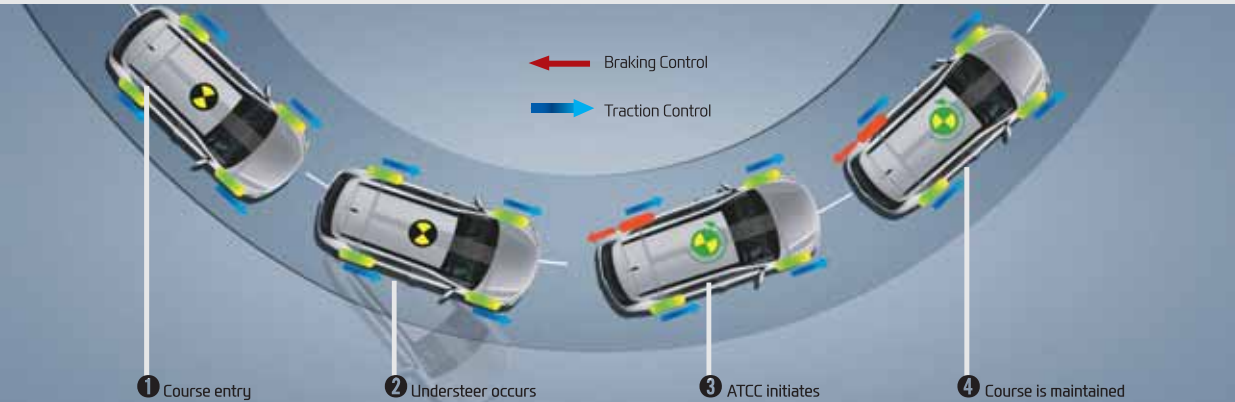

Get the best of both worlds in the Santa Fe with its optimized layout and cutting edge convenience features that make this vehicle a pleasure to drive.

Supervision Cluster: A sharper and more sophisticated Supervision Cluster makes it easy to view a wide range of driving and vehicle status information, and completes the futuristic interior design of the new Santa Fe.

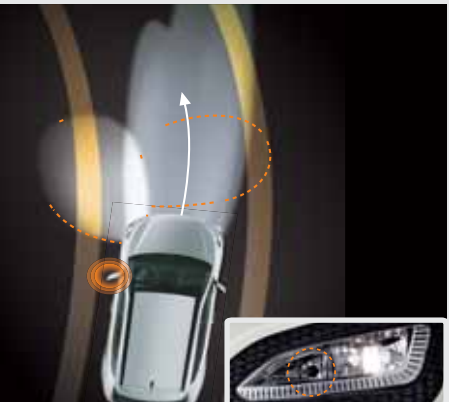

Flex steer™: Flex Steer enables drivers to choose among three driving modes (Normal/Sport/Comfort) according to their preference. The dedicated switch embedded in the steering wheel is easy to operate and can be switched on while driving.

Advanced Traction Cornering Control (ATCC): While accelerating and turning frequently on highway interchanges and curves, ATCC distributes 4WD driving force and braking power. The VDC assesses torque vectoring information, and controls understeering, preventing the driver from overcompensating thereby improving agility and braking control.

Rear Parking System: A rear-view camera with a display on the touch audio screen and rear parking sensors promotes safer parking.

Cornering Lamp: The Cornering lamp automatically lights up with the turn signal, enhancing safety and visibility in the front and sides.

Take on new challenges: The Hyundai Santa Fe ensures the protection of its passengers with a showcase of state-of-the-art active and passive safety features.

BAS (Brake Assist System): Ensuring alltime drive safety the BA System increases braking pressure when it detects an emergency situation.

VSM (Vehicle Stability Management): VSM is one technology that makes your car a safe place to be. It combines the intelligence of ESP with Power Steering. When the driver applies the brakes or accelerates suddenly, VSM helps the car maintain directional stability.

HAC (Hillstart Assist Control): The HAC helps in detecting an incline and brakes are automatically engaged to prevent dangerous roll-back.

TCS (Traction Control System): Maintains control during wheel spin especially during slippery road conditions.

ESC (Electronic Stability Control/4WD Assistance Control): Technologically advanced ESC ensures optimal braking performance by automatically delivering the right amount of braking force to each wheel based on engine torque and driving circumstances.

DBC (Downhill Brake Control): The sophisticated DBC assists the driver in maintaining vehicular control during steep forward movement helping prevent an emergency situation.

6 Airbags: Dual front, side and curtain airbags are installed all around to protect occupants from injuries and help keep them inside in the event of a rollover.

A SPECIAL KIND OF DRIVING EXCITEMENT

The Santa Fe experience goes beyond power and ride smoothness. Now there's the satisfaction of doing more for the environment and saving more on fuel costs.

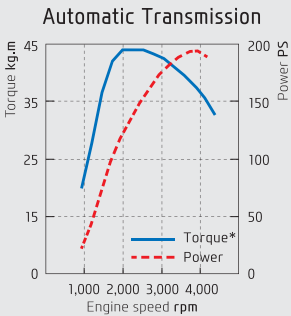

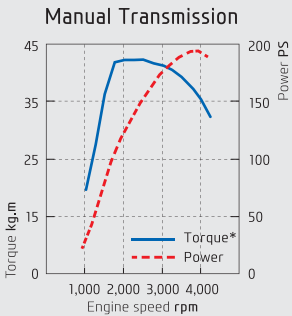

The Santa Fe engine delivers great output and fuel efficiency at the same time. Hyundai engines have been developed steadily to satisfy conflicting goals: high power and low fuel consumption. As a result, we have meticulously reworked our designs and replaced materials to maximize performance and economy. And now, you can benefit from our dedication to excellence when you drive the new Santa Fe.

R 2.2 CRDi Engine

Displacement
2,199cc

Max. Power
197ps / 3,800rpm

Max. Torque
MT 42.9kg.m / 1,800~2,500rpm
AT 44.5kg.m / 1,800~2,500rpm

Active ECO: Actively controls vehicle air conditioner output, engine and transmission activity for better fuel efficiency.

4WD Drivetrain: The advanced 4WD system assesses road conditions and automatically implements rear wheel traction control for full-time four-wheel-drive optimal performance.

6-speed Manual Transmission: The Santa Fe comes with an all new 6-Speed Manual Transmission for those who enjoy stick-shifts, keeping you in control always.

6-speed H-matic Automatic Transmission: Precisely tuned to maximise the dynamic performance of the Santa Fe, the 6-speed H-matic Automatic Transmission delivers perfectly timed gearshifts without any loss in power and momentum. All this to make your driving experience more pleasurable and relaxing.

Headlamp Washer: Maintaining headlamp output is extremely important during inclement weather conditions. The Santa Fe has a strong jet of water that washes the headlamp in frosty or dusty conditions, for better visibility and enhanced safety.

Rain Sensing Wipers: The Santa Fe recognises the first few drops of rain and automatically activates the wipers at an appropriate speed to keep the windscreen clear.

3-Row Air Conditioning: Adjustable air jet housings mounted on the side pillars blend smoothly into the sculpted form of the trim while letting the passengers enjoy fresh air while sitting anywhere.

Button Folding Second Row Seat: The Santa Fe's rear seat layout was designed to provide passengers maximum comfort. Its second seat button folding feature makes it easy for the 3rd row passengers to enter and exit the vehicle.

Flat Folding Third Row Seating: There's always room inside the Santa Fe. The 3rd row flat folding seats allow you to carry your world with you when you travel.

Puddle Lamp: Mounted under the ORVM, the puddle lamp is a light that illuminates the ground below when the door is opened. This ensures better visibility while getting out of the car.

Dual Zone Fully Automatic Temperature Control: Once the temperature is set, the system automatically regulates the cooling in the car for both the driver and passengers.

Chrome Tip Exhaust: This sleek and sporty twin exhaust gives the Santa Fe the bold aesthetic styling it deserves.

Rear Spoiler and Defogger: The Rear Spoiler adds to the sportiness and provides enhanced safety with the High Mounted Stop Lamp. There's a defogger on the back glass that allows you to clear condensation and thaw frost.

40:20:40 Seating Combination: The second row can be divided into a flexible 40:20:40 ratio, leaving enough seating room for long loads like a golf set.

Leather Steering Wheel and Gear Knob: The Leather Wrapped Steering Wheel and Gear Knob in the Santa Fe lends a touch of sophistication to the interiors of the vehicle.
