

The GLA-Class

Mercedes-Benz
The best or nothing.

The GLA-Class. Always restless.

And in the GLA-Class, this restlessness is contagious. In this stylish luxury SUV, even city roads feel like the great wide open. Revel in its sporty, dynamic design, cutting-edge drive systems and a standard of comfort and safety that is unique to Mercedes-Benz. Climb aboard and discover the GLA-Class.

Every ray of sunshine is like a spotlight.

If the road is a stage, the GLA-Class is a true character actor. With its typical SUV proportions and its striking front end, it exudes a self-assured presence. But the GLA-Class is not just an SUV – it is first and foremost a Mercedes. As indicated by the centrally-positioned star in the radiator grille and the so-called “dropping line”. This is the design line which extends from the headlamps along the sides to the rear axle, creating an impression of fluid dynamism even when the vehicle is stationary. No wonder the GLA-Class looks so pleased with itself.

Light Art.

Not very long ago, headlamps were required simply to provide illumination. Today, many headlamps shine like little works of art. This is attributable above all to LED technology. LEDs are long-lasting and more efficient than conventional lights and they create a fascinating light design. LEDs are employed in the front and rear indicators and in the brake light. The daytime running lamps, standing lamps and tail lamps employ fibre optics, which enable a harmonious arc of light. The resultant lights are absolute gems that provide for a distinctive design, day and night. With their powerful output, the bi-xenon headlamps improve visibility in the dark substantially. Dynamic headlamp range adjustment results in the best possible illumination of the road ahead, whatever the vehicle load, without dazzling oncoming traffic.

High noon. With up to 135 kilowatt.

The GLA-Class is driven by self-confident people with a thirst for adventure. With cutting-edge engines in its class, it is equipped with a high-tech package including turbocharging and direct injection.

A night in watching TV? Or how about
starring in your very own road movie ...

In the background:
the low-lying sun.

Colour is a vital ingredient of any tale of nature, adventure and freedom.
The GLA-Class is available in the special paint finish that shines resplendently
in the evening sun – and at any other time of the day or night, too.

Tell-tale signs of the GLA's adventurous spirit are to be found wherever you look. The structured bonnet with powerdomes and the radiator grille with two fins lend the front a particularly wide appearance. The appearance is also enhanced with the black grained panelling on wings and side skirts, the shoulder-line trim strip and load sill guard in chrome. The bumper features criss-cross grating and underneath the bumper is the typical SUV-style underguard. The front bumper and the typical SUV-type rear bumper come with black grain trim and under guard in matt silver chrome. Highlights at the rear are the chrome strip between the lights and the roof spoiler.

The centrepiece of the cockpit is the large free-standing colour display – the point of access to a whole world of information and entertainment in your GLA-Class. As an exclusive GLA-Class feature, the galvanized bezels around these circular vents, echo the SUV-look of the skid plate and side sill panels. The round air vents are design classics in the making, embodying the traditional workmanship and use of high-quality materials. In the GLA-Class, the armrest in the rear opens up to reveal cupholders along with a loading function when the armrest is pulled down.

*Please read the disclaimer.

The panoramic sliding sunroof

The interior of the GLA-Class holds a number of surprises in store, with a spacious feeling for a luxury car. The panoramic sliding sunroof conjures up a particularly bright and inviting atmosphere. The rear part consists of a fixed panoramic glass roof while the front part is an electric glass sliding sunroof. Two electric sunblinds provide shade from strong sunlight. In all, an ideal setting to enjoy your new-found freedom.

Off-road comfort suspension

Equipped with an India specific suspension, the chassis is raised by 30 mm. This results in improved off-road capabilities thanks to a greater ground clearance of 183 mm with a higher seat position and also a striking off-road look. This suspension variant also features its own steering tuning which enables the GLA-Class to master the most challenging roads.

Driving ambition

The GLA-Class is intended to inspire, to fire your imagination and to rouse your spirits. It certainly had this effect on us, prompting us to develop a completely new generation of engines. A cutting-edge technology package compact and lightweight design that produces amazing results.

The diesel engine: good vibes and virtually no vibrations

The GLA 200 CDI has an output of 100 kW and gives a class leading fuel efficiency of 17.9 km/l. With up to 300 Nm of torque, it offers an effortlessly superior driving experience. Overtaking maneuvers are performed with astounding ease born of refined power. The latest generation of common rail direct injection enables efficient combustion and exceptionally smooth and quiet running.

The petrol engine: power-packed performance

Driving becomes a pleasure with the 4-cylinder petrol engine with a displacement of 1991cc in the GLA 200, which gives a fuel efficiency of 13.7 km/l. With up to 135 kW of power and 300 Nm of torque, it offers an explicit driving performance with phenomenal top-speed and acceleration.

A benchmark in efficiency

The GLA's low fuel consumption is attributed to innovative technologies – and our fundamentally holistic approach dedicated to the efficient husbanding of natural resources. We sum this approach up in one word: BlueEFFICIENCY. In concrete terms, this means burning fuel only when it is actually needed, for example. To this end, every GLA is

equipped as standard with the ECO start/stop function, which temporarily shuts down the engine while the vehicle is stationary – in a traffic jam or at a red traffic light, for example. The ECO display is another standard-fit item which helps you to adopt a fuel-saving style of driving – this is still the most effective way of driving with maximum efficiency.

Note : Not conducive for driving in Waterlogged roads with still water depth more than 25 cm.

The engine range

Diesel:

GLA 200 CDI with an output of 100 kW and 300 Nm of torque

Petrol:

GLA 200 with an output of 135 kW and 300 Nm of torque

*Please read the disclaimer.

7G-DCT: Dynamic performance without interruption

Some like to change gear themselves, others prefer the automatic option. There are such good grounds for each of these alternatives that we have incorporated them both in a single transmission: the 7G-DCT dual clutch transmission. The 7G-DCT consists of two sub-transmissions, each with its own clutch. This offers the advantage that the next gear is already engaged and gear-shifting takes place without any

interruption in tractive power. This provides for even more comfortable driving – and above all, automatic gear-shifting is finally as fast as manual mode. We nevertheless appreciate that, however good an automatic transmission may be, many drivers prefer to change gear themselves. Consequently, the package includes steering wheel shift paddles – like in motorsport.

In short : the transmission variants

The 7G-DCT dual clutch transmission enables fast, smooth gear-shifting without any interruptions in tractive power. The shift characteristics can be preset from fuel-saving to sporty.

We are driven by our vision of accident-free driving

We are the first automobile manufacturer worldwide to have developed an integral safety concept aimed at avoiding accidents, ensuring ideal responses to dangers and lessening the consequences of accidents. For the occupants of a Mercedes and for all other road users, too.

Airbags

In addition to the robust bodyshell structure and the highly stable occupant cell, there are seven standard-fit airbags to provide the best protection possible for the occupants: the front airbags which are deployed in two stages, depending on the severity of the impact and accident characteristics, windowbags between the A- and C-pillars and sidebags for the driver and front passenger, which serve as thorax/pelvisbags.

The kneebag can further reduce the forces exerted on the driver in an accident.

ATTENTION ASSIST

This system can improve driving safety, especially on long journeys and at night. ATTENTION ASSIST monitors the steering behavior of the driver to recognise typical signs of drowsiness and severe loss of attention and gives a visual and audible warning of impending microsleep.

Headlamp Assist with automatic headlamp activation

Depending on the ambient light conditions, Headlamp Assist automatically switches the low-beam headlamps on or off. In fast-changing lighting conditions especially where the system is able to improve driving safety and relieve driver stress. Like for example, when entering tunnels or multi-storey car parks.

Anti-lock Brake System (ABS)

The anti-lock braking system (ABS) ensures greater handling safety by preventing wheel-locking especially during emergency braking. This helps the driver to keep the vehicle under control. Like for example, during evasive action or when braking on slippery road surfaces.

Brake Assist System (BAS)

The system is able to recognise emergency braking by the driver and increase the brake pressure within fractions of a second to shorten the braking distance. To do this, Brake Assist measures the speed of brake pedal operation.

Adaptive Brake System

The braking system improves driving comfort and safety with the anti-lock braking system (ABS) as a base function. It helps the driver to master critical braking maneuvers more safely and also assists the driver with day-to-day convenience functions such as Hill-Start Assist.

Electronic Stability Program (ESP)

In dynamically critical driving situations the Electronic Stability Program (ESP®) can counter any tendency to skid. By applying specific braking action at individual wheels, ESP® reduces any tendency to over steer or understeer, thereby improving driving safety.

Tyre Pressure Monitoring System (TPMS)

Continuous monitoring of the tyre pressures improves driving safety and increases the operating life of the tyres. The tyre pressure of all four wheels is monitored by sensors and indicated in the multifunction display of the instrument cluster.

Hill Start Assist

Hill-Start Assist enhances comfort and safety and prevents the driver from rolling back in the opposite direction to the engaged gear as the driver moves his foot from brake to accelerator while moving up on uphill gradients.

Acceleration Skid Control

Acceleration skid control (ASR) prevents individual wheels from spinning, when the vehicle is moving on and accelerating on snow, wet road surfaces or gravel. It prevents the vehicle from braking away sideways.

Childproofing manually operated for the rear doors and electrically operated for rear power windows

To prevent children in the rear from opening the doors or side windows on their own, the rear doors can be secured mechanically and the power windows electrically. The doors can then only be opened from outside and the side windows can only be opened via the control buttons in the driver's door. In an event of crash, the doors unlock automatically and fuel supply shuts off.

Lamp failure indicator

This feature provides reliable information when the bulbs of headlamps and tail lights fail.

QR code stickers for post-accident rescue

The QR codes are attached to the fuel tank cap and opposite to the B-Pillar. Scanning the QR code displays the current rescue information for the respective vehicle model.

Adaptive brake lights flashing

During emergency braking, flashing brake lights can help to reduce the reaction time of the driver behind significantly. Adaptive LED brake lights therefore make an important contribution to the avoidance of rear-end collisions.

Soothing music. Adds the extra amount of relaxation to your luxurious drive

The **infotainment system** ensures that you have an entertaining journey. The Mercedes-Benz multimedia system boasts a TFT colour display with a 14.7 cm diagonal screen. With its integral CD drive both MP3 and WMA/AAC files can be played. It can be conveniently operated via the multifunction steering wheel and the controller and it includes an integral telephone keypad, a Bluetooth® interface with a hands-free function and an Aux-in and USB socket in the stowage compartment. This means that you can easily play music that you have saved on an MP3 player, smartphone or mobile data carrier, for instance.

*Please read the disclaimer.

Been to a concert lately?

With twelve loudspeakers, including a bass speaker, and a 9-channel DSP amplifier the optional 450 W Harman Kardon® Logic 7® surround sound system offers a perfect audio experience. This set-up transforms the interior of the GLA-Class into a concert hall.

The Logic 7® multi-channel technology provides for an authentic surround sound. Designed to deliver a 360-degree audio experience in every seat.

Centerfill speaker Tweeter Low-/mid-range speaker Mid-range speaker Bass speaker

Looking ahead. And keeping an eye on the rear

Reversing and manoeuvring are not the most pleasant situations for a driver. But what used to be rather tricky operations can now be performed with ease. The **reversing camera** is switched on automatically when the driver selects reverse gear, and shows the driver the area behind the vehicle on the CENTRAL MEDIA DISPLAY. Dynamic guide lines provide clear orientation for manoeuvring. And when reversing, for example from a house drive or parking space, the driver can switch to a wide-angle view of 180 degrees so as to recognise approaching pedestrians or vehicles sooner. After use, the camera folds in again automatically, ensuring optimum protection from soiling.

*Please read the disclaimer.

Stylish yet spacious

The load compartment has SUV-specific features such as a robust external loading sill guard. The flexible and variable interior of the GLA makes it your best adventure companion. The open luggage compartment capacity behind rear seat is 421 (l). The rear seat backrests can be folded down 40:60 and also feature a load through function making it easy to transport long objects. The rear seat backrests fold down completely and will then offer 1235 litres of loading space.

In order to enlarge the luggage compartment, the **backrests** of the rear seats can be folded forward either together or separately.

Standard equipment

There are countless ways of making the new GLA your very own. From small details that add special touches to comfort features which until recently were the reserve of the luxury segment.

The **reversing camera** is switched on automatically when the driver selects reverse gear, and shows the driver the area behind the vehicle on the CENTRAL MEDIA DISPLAY. What used to be rather tricky operations can now be performed with ease.

The GLA-Class comes with electrically adjustable driver seat with memory function. The **memory function** is able to save three individual settings for the seat positions which can be called up at any time.

In the GLA-Class, the **rear armrest** opens up to reveal cupholders along with a loading function when the armrest is pulled down.

Standard equipment

Each **roof rails** are harmoniously integrated into the vehicle's design and serve as a base for various roof racks and roof luggage carriers.

The **ATTENTION ASSIST** in the GLA-Class recommends taking a break if it detects signs of driver drowsiness or inattention.

Bi-Xenon headlamps offer vast luminous power to improve night-time vision and visibility considerably while also illuminating the edges of the carriageway more clearly and over a wider area.

The GLA 45 AMG 4MATIC

World's most powerful 4 cylinder series production engine.

The outstanding performance and efficiency of the GLA 45 AMG 4MATIC is a result of extensive development work. The innovative AMG 2.0-litre 4-cylinder bi-turbo engine produces 265 kW. The high-performance engine generates 450 Nm of torque, thus accelerating the vehicle from 0 to 100 km/h in a staggering 4.8 seconds only.

The high-performance engine is fully hand-crafted according to the traditional AMG philosophy “one man, one engine” – as indicated by the AMG engine plate bearing the signature of the responsible AMG technician.

The **AMG SPEEDSHIFT DCT 7-speed sports transmission** features three transmission function modes as well as an automatic double declutching and Racestart function.

The **3-stage Electronic Stability Programme (ESP®)** serves to alter the characteristics of the all-wheel drive system from sporty with an emphasis on safety to maximum performance on cordoned-off race tracks.

The **AMG high-performance braking system** enables outstanding deceleration characteristics thanks to large, internally ventilated and perforated brake discs.

AMG speed-sensitive performance steering supports a sporty driving style by its direct steering behavior and rapid responsiveness.

The GLA 45 AMG 4MATIC technology

AMG performance 4MATIC with AMG-specific electro-hydraulic control via multi-disc clutch makes variable torque distribution possible depending on the handling situation which ranges from 100% front-wheel drive to a ratio of 50:50. Thanks to this innovation, the all-wheel drive adapts to the driving situation flexibly and very quickly.

Genuine accessories

The GLA-Class is a car that combines comfort and safety with a sporty driving experience. Genuine accessories from Mercedes-Benz allow you to build on these qualities at the same time giving a personal touch to your car.

Rear Seat Entertainment system

This elegant DVD system allows the rear passengers to watch DVDs, look at their favorite pictures and even play video games on two superb 17.8 cm screens with TFT technology, without disturbing the driver or restricting the rear field of vision. Rear-seat passengers have the option of watching a different video source on each screen, allowing each to select their own individual entertainment. The AV-IN connection and USB and SD card interfaces allow other storage media to be used too. Supplied with two sets of infrared headphones and remote control. A separately available video cable allows users to watch videos or view images from external sources.

Rear Seat Entertainment system

Apple iPad2®-iPad4® Docking Station, rear, kit

The ergonomic, crashproof Docking Station introduces the iPad® and all of its familiar functions to your Mercedes-Benz. All connections, e.g. for your headphones or charging cable, remain accessible. The mount is fitted to the head restraint and can be tilted and rotated around 90°. Available for iPad®, iPad® 2, iPad® 3 and iPad® 4.

Apple iPad2®-iPad4® Docking Station, rear, kit

Quickpark - Parking made easy

The Quickpark parking assist system is ideal at places where space is limited. The system is automatically activated when reverse gear is engaged. It is based in ultrasonic technology: ultrasonic signals are bounced back off obstacles in their path, and the distance between the vehicle and the obstacle is indicated by an audible warning signal.

Quickpark

Navigation 20

Fully integrated, fully featured, fully connected: the Navigation 20 along with accurate and detailed maps of thousand cities and towns across India, your Mercedes-Benz Navigation system comes loaded with millions of points of Interest. These include establishments like ATMs, petrol bunks, restaurants, hospitals, malls and a lot more.

Light Alloy Wheels

Mercedes-Benz light-alloy wheels not only boost your vehicle's looks, they also offer the ultimate in safety. All wheels are precision-tailored to your vehicle in terms of load profile and dimensions. Before your light-alloy wheels are allowed to accompany you safely on your travels, they are subjected to an extensive development and testing programme. Each wheel design has to pass a variety of endurance tests, based on exacting Mercedes-Benz guidelines, all of which exceed statutory requirements. These include special test routines which simulate real challenges on the road and material tests in cutting-edge x-ray facilities. Only once all of the tests have been passed may the wheels be included in the range of genuine Mercedes-Benz light-alloy wheels. Add an individual touch to your vehicle with a tested and approved genuine Mercedes-Benz light-alloy wheel and head for the open road.

Hub Caps Mercedes-Benz hub caps provides a stylish finish for light Alloy wheels. It is not just attractive but practical too as the caps keep the hubs clean. There are plenty of options available to choose from various designs available to suit Mercedes-Benz vehicles.

Valve caps, black Chrome valve caps with a Mercedes-Benz star logo embossed on head, add a refined stylish finishing touch to all Mercedes-Benz light alloy wheels.

Genuine accessories

Cargo and Care

Stowage crate

A secure hold for items which are prone to tip over or slide around, e.g. shopping bags. Adjustable partitioning elements allow crate to be divided into max. four sections. Optimum functionality only in conjunction with shallow boot tub.

Shallow boot tub

Made from impact-resistant, non-slip polypropylene. Suitable for transporting foodstuffs. Structured surface holds separately available stowage crate in place.

Concertina load sill protector

Protects the rear of the vehicle from scratches when you're loading the vehicle – and prevents dirt from the car from getting onto your clothes. Practical design – can be secured to shallow boot tub or reversible mat.

Reversible mat, black

One high-quality velour side and one rubberised, non-slip side. Design allows concertina load sill protector to be connected.

Stowage crate, black

Boot tub, shallow, black

Concertina load sill protector, black

Other Accessories

Coolbox

Not only cools but warms too. Cools to up to 20°C below ambient temperature – to max. -2°C. Can be switched to warming function. Robust, highly insulated hard case with fabric cover, outside pockets and padded shoulder strap. Capacity: 24 litres. Can be connected to 12 V socket in vehicle or to 230 V power source via separately available rectifier.

Rectifier

Allows the coolbox to be connected to a 230 V socket at home.

Coat hanger

Minimize creasing with this stylish and practical coat hanger made from chromed metal. Easy to fit to the front head restraints.

Tyre pressure gauge

Allows you to carry out a quick tyre pressure check on the road or at home. Keeping tyres at the optimum pressure saves fuel and reduces tyre wear. Suitable for all motor vehicle tyre valves and for cycle valves. Supplied with leather pouch.

Multipurpose holder

The multipurpose holder divides the open stowage compartment in your centre console into two subcompartments of equal size, designed to hold cans and drink containers securely in place. Stowage space for parking permits, plastic cards and coins. In high-quality plastic with chrome trim.

Service

The luxurious experience of driving a Mercedes-Benz is converted into a fulfilling ownership experience with a range of exclusive services and special programmes.

Cost of Ownership

There has been a paradigm shift in the buying preferences of Indian consumers over the years, even for the luxury products. The purchase decision not only dwells around cost of acquisition but also the total 'Cost of Ownership' (COO). Amongst the key components of COO in cars are the routine service jobs and the unplanned repair expenses post the warranty period. We are now offering highly affordable Service Packages and Extended Warranty Programmes which includes

a **standard 2 year warranty along with a 1 year extended warranty** and is considered as the most competitive package in its class. All in all, we provide you with a controlled Cost of Ownership while you benefit from the legendary Mercedes-Benz service quality.

STAR CARE

Experience complete peace of mind when you drive the Star. STAR CARE programme offers peace of mind drive for you during warranty period and beyond. While our cars are covered for warrantable repairs up to 3 years without any mileage limitations, as standard, you can also buy STAR CARE Plus programme, offering 4th year extended warranty. Additionally, the programme enhances the resale value of your car.

Extended Warranty that guarantees complete peace of mind

STAR EASE

STAR EASE Service Package gives you the freedom to relax behind the wheel and puts your mind at ease with its range of unique benefits such as defined cost of maintenance and priority handling. STAR EASE Comprehensive package covers essential jobs related to periodic service (viz. oil, filters, consumables, etc.) along with coverage for brake pads, brake discs, wiper blades and wheel alignment & balancing, for a contracted period. For further details on products and pricing, please contact your nearest Mercedes-Benz dealer.

The maintenance of your Star is just as peaceful as driving it

On-Road Assistance Programme

As part of our ongoing commitment to you, Mercedes-Benz On-Road Assistance is designed to enhance your overall Mercedes-Benz ownership experience by providing you with 24 hour On-Road Assistance. Mercedes-Benz is the only Luxury car manufacturer to offer round-the-clock On-Road Assistance for **3 years** from purchase of vehicle as a **standard offering**. Peace of mind motoring – guaranteed.

Always at your service

Conditions apply.
